[6]

This paper presents the case of study on how the IT industry becomes a driver of the e-Government in Colombia. Working together the government and the IT industry seeks to boost the e-Government strategy, especially at regional and local level which is the focus of Colombia right now. It also helps to address the existing mismatch between the IT services and solutions provided by private sector and the government needs.

Pestañas verticales

Descripción

This paper presents the ongoing process led by the e-Government Office in Colombian to involve the IT industry, particularly the IT regional clusters as main drivers of the e-Government Strategy implementation. Such initiative is based on the fact that the cluster-like structure is a key element for the regional development.
